

**Golden Plains
Middle/High School
Internet Access Policy**

Approved 7/17/17

Golden Plains USD #316 will provide Internet access at the MS/HS Building in Rexford using the following guidelines.

The Golden Plains MS/HS Internet network has been password protected. Access to the USD316 network at Golden Plains Middle/High School will only be allowed with permission of the administration and technology coordinator at Golden Plains Schools. Access will be granted on devices when the technology coordinator enters the password needed for access. Only the technology coordinator will have access to the password with a backup of the password placed in a secure location in case of emergency. Passwords may be changed at any time at the discretion of the USD #316 administration.

School-Owned Devices:

All district-owned devices, including computers, Chromebooks, iPads, and other school owned network accessible devices, will be allowed access to the USD316 internet network. The technology coordinator will insert the password on school-owned devices.

Staff-Owned Devices:

Each staff member, including certified and classified staff members, will be allowed one personal device on the Internet network. Staff members will need to bring their device to the technology coordinator to insert the password. The network password will not be given to staff members.

Student-Owned Devices:

Student owned devices will not be allowed access to the USD316 network unless determined necessary by the district administration and technology coordinator.

Guest Network:

A guest network will be available for guests needing Internet access to the USD316 network with a limited number of access points. Guests will be provided the password to the network on an as-needed basis by the technology coordinator and/or administration.
